Many scientists have said that, "By 2100, the average U.S. temperature will rise at least 6°F." How many degrees Fahrenheit do you personally expect the average U.S. temperature to rise by 2100, if further regulatory steps are not taken?

Block 2

Assume that in the last few weeks, some prominent scientists have reassessed the science, concluded that the situation is far better than had previously thought, and stated that unless further regulatory steps are taken, "By 2100, the average U.S. temperature is projected to increase by about 1°F to 5°F, depending on emissions scenario and climate model."

How much do you personally believe that the average U.S. temperature will rise by 2100, if further regulatory steps are not taken?

Block 3

Assume that in the last few weeks, some prominent scientists have reviewed the science and concluded that the situation is far worse than they had previously thought. They stated that unless further regulatory steps are taken, "By 2100, the average U.S. temperature is projected to increase by about 7°F to 11°F, depending on emissions scenario and climate model."

How much do you personally believe that the average U.S. temperature will rise by 2100, if further regulatory steps are not taken?
